

# EchoRead

EchoRead

*“Because not everyone can read — but everyone deserves to listen.”*

# 1. The Core Idea

EchoRead transforms any written content — articles, books, PDFs, newsletters, or webpages — into a clear, natural spoken experience.

Upload a link, and within seconds, the app reads it aloud in a human voice.

It's built for everyone who wants to absorb knowledge hands-free — from visually impaired users to professionals on the move.

## 2. Why It Matters

We live in a world full of text — but not everyone can access it easily.

EchoRead gives voice to information and time back to people.

Accessibility: Empowers people who are blind or visually impaired to read anything, instantly.

Productivity: Turns reading into listening — while driving, cooking, walking, or exercising.

Inclusivity: Democratizes access to knowledge for those with dyslexia, eye strain, or learning differences.

Ease: No complex setup. Just paste a link, and it talks.

## 3. How It Works

Upload or paste a link, PDF, or text.

Choose your voice (male/female, natural tones, or expressive).

Press “Play.”

EchoRead instantly narrates the content — line by line, or in chapters.

Bonus Features:

Adjustable playback speed & tone.

Multilingual support.

Save articles for later or convert them to personalized playlists.

Integration with Pocket, Kindle, or RSS feeds.

## 4. Key Audiences

Segment	Use Case
Blind / Visually Impaired	Access any online content independently.
Busy Professionals	Listen to research or reports while commuting.
Students	Review study materials without screen fatigue.
Readers on the Move	Enjoy books or articles during daily routines.
Elderly Users	Ease of access to news and stories without reading strain.

## 5. Vision Statement

EchoRead exists to make every word accessible,  
every moment productive,  
and every mind a little freer.
